Projects

A & A Designs - a-and-a-designs.us - github.com/AutoDave91/A-and-A-Designs

React | Axios | React-redux | Node.js | Express | Bcrypt | Massive | CSS | NodeMailer | Stripe | SQL

An e-commerce site for buying products made by sister-in-laws from Texas.

- Personal project built and styled from scratch in 2.5 weeks
- Created an e-commerce site with functional sessions, admin site (including wizard for adding products), and cart
- Integrated Stripe in order to accept payments and NodeMailer in order to allow admins to send newsletters.
- Made fully mobile-responsive in order to capture as many potential customers as possible

Welp - welp-em.com - <https://github.com/welpem/welp>

React | Axios | React-redux | Node.js | Express | Bcrypt | Massive | SQL

A Business resource site allowing businesses to warn other businesses of potential threats from customers.

- Group project built and styled from scratch in 2.5 weeks
- Created a business resource site where businesses can rate customers and warn other businesses of potential threat.
- Personally coded the auth process from registration to logging out and anything referencing the user in-between (sessions and react-redux) along with the “about” section of the site and the README.md file for our github repo.

About Me

I have worked hard my whole life. While working my employers (and coworkers) get 100% of my focus and effort. When not at work I enjoy kayaking lakes by the house, at times even fishing from the kayak. When not on the water, I spend my time with my Wife of 7 years and my 7-month-old daughter. By night I join a group online who play RPG games including D&D and Star Wars: The Old Republic.
